ABOUT ME

I am a dedicated researcher with expertise in microbiology, molecular biology, bioinformatics and animal handling for preclinical studies. My work spans bacterial membrane vesicles, antimicrobial peptides, gene expression analysis, and computational drug discovery. I have extensive experience in sequencing data analysis for Illumina and Nanopore platforms, as well as transcriptomics-based differential gene expression analysis. Passionate about translational research, I aim to bridge computational and experimental biology for innovative solutions in biotechnology and healthcare.

EDUCATION

Integrated MSc Life Sciences

Central University of Tamil Nadu

2015-2020

CGPA 8.3/10, First class with Distinction

SKILLS

Microbial techniques

Molecular techniques

Animal Handling

Computational - Docking & Dynamics

Sequencing - Nanopore & Illumina

Microscopy - CLSM & SEM

PCR - Conventional & q RT PCR

Flow cytometry

Proteomics - SDS PAGE & Western blot

PROFESSIONAL EXPERIENCE

2024 - Present	ICMR Project Scientist (Doctoral Research Fellow) Vellore Institute of Technology, Vellore
2022 - Present	Doctoral Research Fellow Vellore Institute of Technology, Vellore
2021 - 2022	SERB Junior Research Fellow Central University of Punjab, Punjab

EXAM QUALIFIED

Gradual Aptitude Test for Engineering (GATE) - Life Sciences, 2020, India.
Percentile - 78.6

TEACHING EXPERIENCE

2022 - 2023	Teaching cum Research Assistant Vellore Institute of Technology
-------------------	---

LANGUAGE

- Tamil (Native)
- English (Proficient)
- Hindi (Intermediate)

PROFESSIONAL MEMBERSHIP

2024 – Present	Contributing Membership American Society of Microbiology
2025 – Present	EXO–RISING Membership Indian Extracellular Vesicles Society

SCIENTIFIC PRESENTATIONS

2022	Poster Presentation IMMUNOCON- Annual Conference of the Indian Immunology Society, PIGMER, Chandigarh.
2023	Poster Presentation International Conference on Biotechnology for Environment & Health (ICBEH), VIT, Vellore.
2024	Poster Presentation International Conference on Contemporary Antimicrobial Research (ICCAR), NEHU, Shillong.

RESEARCH TRAININGS

2024	Extracellular Vesicles: Isolation, Characterization & Applications, AMRF, Madurai
2025	Training on the state of art advanced multi omics techniques in Molecular Oncology, ICMR, Govt. of India, Cancer Institute (WIA), Chennai.

ONGOING RESEARCH WORK

Parkinson's Disease Multi-Omics Integration

Conducted integrative multi-omics analysis combining brain transcriptomics and gut microbiome metagenomics datasets from control and Parkinson's disease cohorts to investigate the gut-brain axis. Performed differential gene expression analysis using DESeq2 and carried out comprehensive microbiome profiling using HUMAnN and MetaPhlAn. Mapped host-microbiome interactions to identify functionally relevant associations contributing to neuroinflammation. Applied machine learning approaches, including Random Forest-based feature selection, to identify key predictive signatures and potential biomarkers associated with Parkinson's disease pathology
